Omisirge® Cell Therapy Treatment Centers
ETS Program Reference Guide

Emerging Therapy Solutions® (ETS) helps reinsurance and stop-loss payers, health plans, HMOs, and self-funded employers, along with third-party administrators and brokers, manage the risk associated with high-cost therapies for rare and complex conditions.

Programs listed here are manufacturer-approved treatment centers for which ETS has contracted rates in place or has access to rates through single case agreements for **Omisirge** (omidubicel-onlv) which is approved for patients 12 years and older with hematologic malignancies who are planned for umbilical cord blood transplantation following myeloablative conditioning to reduce the time to neutrophil recovery and the incidence of infection and adults and pediatric patients 6 years and older with severe aplastic anemia (SAA) following reduced intensity conditioning.

For assistance with your member referral or for more information, contact ETS at 877-445-4822 or by email at clientservices@emergingtherapies.com.

▼ Denotes facilities that currently have cellular therapy rates in place with ETS.

State	City	Program Listing
