

Congenital Heart Disease ETS Program Reference Guide

Emerging Therapy Solutions® (ETS) helps reinsurance and stop-loss payers, health plans, HMOs, and self-funded employers, along with third-party administrators and brokers, manage the risk associated with high-cost therapies for rare and complex conditions.

Our *ETS Programs of Excellence* model identifies healthcare facilities that deliver quality, cost-effective care. Below are Congenital Heart Disease (CHD) programs for which ETS has contracted rates in place.

For assistance with your member referral or for more information, contact ETS at 877-445-4822 or medicalservices@emergingtherapies.com.

*“Select” programs meet specific ETS criteria for designation.

**Congenital heart services at this site exclude pediatric heart transplants and ventricular assist devices (VAD).
