

Cell & Gene Therapy Program Overview

For Patients with Complex Conditions to Access Cell & Gene Therapy Care

At Emerging Therapy Solutions (ETS), we understand the challenges of navigating treatment for complex or chronic conditions. Our Cell and Gene Therapy Program supports you through each step of your journey, including connecting you with access to available care.

Offering Health Resources, Education, and Support

Education on Conditions and Therapies

Educational information for you about your condition, the cutting-edge cell or gene therapy you may be eligible for, and how it may help you address your condition.

Treatment Center Support

If you decide to proceed with treatment, we'll help you find an approved care center that specializes in your condition.

Individualized Resources

Connect you with resources for support as you navigate treatment and related challenges you may face, such as access to travel benefits.

Support Through the Process

ETS Care Guides are available to patients that could potentially receive a cell or gene therapy. Our Care Guides can answer questions and provide ongoing support, from evaluation to post-treatment follow-up.

Available to Those Eligible

Active employees, and pre-Medicare retirees and your dependents enrolled in a self-insured medical plan* are eligible and have access to the ETS Cell and Gene Therapy Program. Cell and gene therapy treatment is available to you or your covered dependents under this program for which plan copays, deductibles and out-of-pocket may apply.

*Excludes fully-insured managed care options, such as an HMO.
